

Managed Services

Free up internal resources and create business value by offloading management of your data protection to experts with decades of experience.

MONITOR, OPERATE, AND CONTINUOUSLY IMPROVE

Do you have the resources to monitor, operate, and continuously improve your data protection technologies and programs? Most organizations struggle to hire and retain the right expertise. We can help.

Services

- Analyze and optimize data and cloud security policies on an ongoing basis for greater accuracy and business alignment
- Provide risk-based reporting across data, privacy, and cloud security programs
- Leverage leading practices from similar industries and regulatory environments
- Prioritize what to protect based on the business value of data/digital assets

Supported Platforms

SECURE SERVICE EDGE (SSE)
DATA LOSS PREVENTION (DLP)
PRIVACY
CLOUD SECURITY
DISCOVERY & CLASSIFICATION

KEY CAPABILITIES

Policy Administration

- Program management and business analysis to align policies with business/regulatory requirements and industry best practices
- Policy definition, configuration, testing and tuning

Platform Health

Monitoring and management of health and performance across data protection and privacy tools, including endpoint clients and the cloud; application upgrades and patches

Value Realization

- Enabling licensed and unused features and tuning for your environment
- Optimizing data-centric programs and technologies to increase efficacy and efficiency
- Monitoring, operating, and continuously improving platforms and programs
- Enriching data protection programs to reduce risk

Reporting and Analysis

- Key findings across tools; trend analysis and recommendations
- Program metrics, KPIs, and identification of high risk events/users/business units

CHALLENGES WE ADDRESS

Too Many Alerts

Analysts are overwhelmed by alerts from policies that are not tuned to the business' needs or not optimized to produce useful, actionable information

Not Enough Visibility

Point solution reporting doesn't provide a full view of risk across the entire business. Decision-makers have limited ability to compare the business to others in the industry.

Hours of Manual Effort

The manual effort needed to visualize data for various target audiences takes up valuable time and is inefficient.

Regulatory Shifts

Regulatory changes require new security and privacy tools and processes—keeping up is labor and time intensive.

Focus on your business.

We live and breathe data. By protecting your data, your customers, and your entire organization, we enable your team to spend time and resources on new initiatives and business priorities.

Drop the endless search for talent.

Get the data security resources you need without the expensive cycle of searching for qualified talent. Plus, benefit from our team's knowledge of leading practices from similar customers, industries, and applicable regulatory environments.

Continuously improve.

We constantly monitor and optimize your entire data-centric ecosystem. Plus, our expertise gives you meaningful results and visualizations for targeted audiences, so you can make better business decisions.

ABOUT CLOUDRISE

Cloudrise is a technology-enabled services firm focused on securing organizations' data—wherever it resides. We help organizations elevate their data protection, privacy, and cloud security programs, tailoring them to meet specific business needs. Cloudrise draws on more than two decades of experience delivering data-centric advisory, implementation, optimization, and managed services.
