

Managed Services

Free up internal resources and create business value by offloading management of your data security technologies and program to the experts.

IT'S A PEOPLE PROBLEM

Do you have the resources to build, deploy, manage, and continuously improve your data protection program and technologies? Most organizations struggle to hire and retain the right expertise. We can help.

There is less than **0%** unemployment in cybersecurity.¹

In 2023 there are **3.5M** reported global cyber security job vacancies, with more than **750K** of those positions in the U.S.²

Customers around the world tell us: "We do not have enough people to operate and optimize our technology."

By 2025, lack of talent or human failure will be responsible for **over half** of significant cyber incidents.¹

These stats are not new – we have been talking about the negative unemployment rate for years – the problem also is not going away. That is why Cloudrise exists. **As an extension of your team, we solve the "people-problem" and maximize the value of your security program and technologies.**

HOW WE SOLVE THE PEOPLE PROBLEM

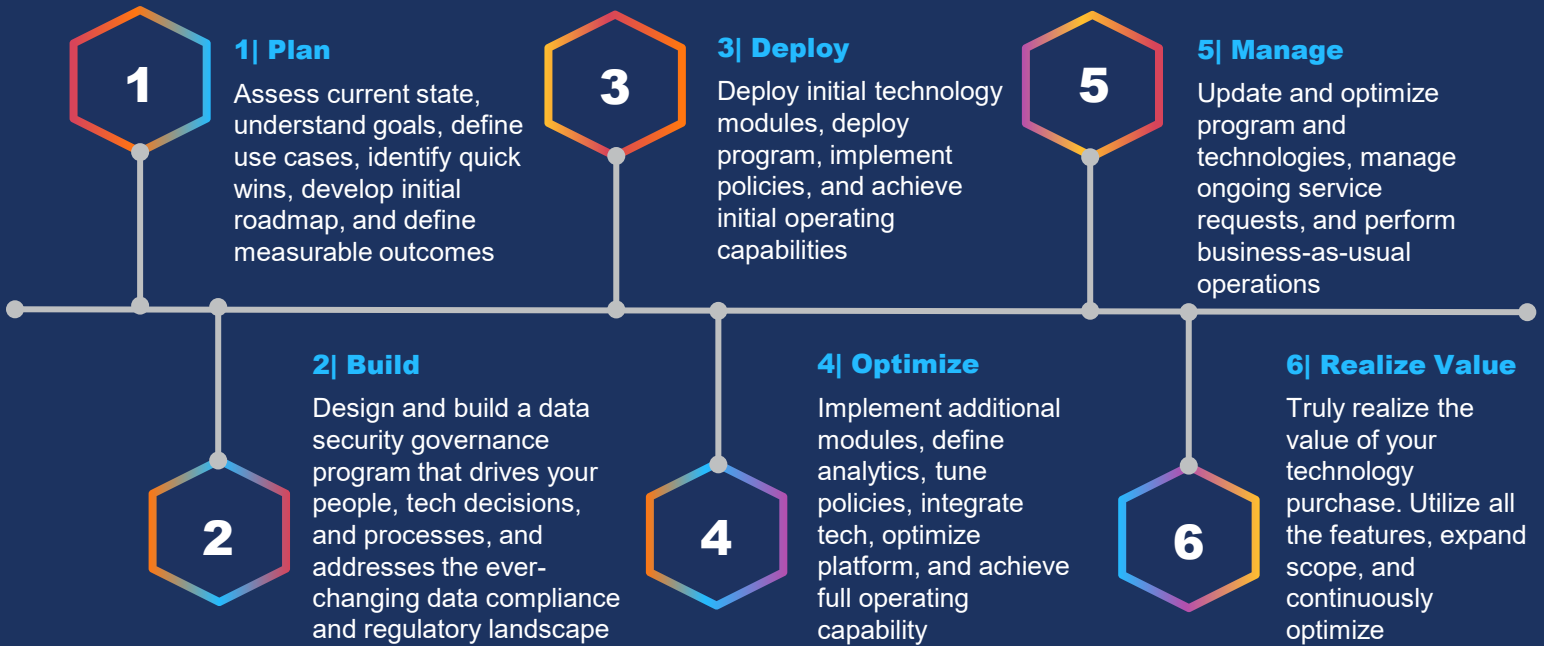

We have an extensive network, know how to cultivate great talent, and have a purpose-built program to train our US and UK-based team members to be the best data security experts in the world. With a focus solely on data-centric technologies, we provide our customers the talent, scale, and expertise to manage and evolve their data-centric program and technologies.

Benefits of Cloudrise as Your Managed Services Provider

- + End the vicious cycle of constantly looking for talent to run critical applications.
- + Leverage leading practices from similar industries and regulatory environments.
- + Work with a services provider who is focused solely on data instead of all-things cybersecurity.
- + Focus on your business while we protect your data.

HOW THE SERVICE WORKS

Once we understand your business use cases, we will develop a roadmap and then build, deploy, optimize, and manage your data security program and technologies so you can realize the utmost value from your purchase. We sell our services as 1 to 3-year subscriptions. Why? It's simple – map your services to your cloud-based subscriptions and then focus on your business...while we protect your data.
