

# BigID & Cloudrise

## Jumpstart Data Security, Governance & Risk Management

Combine BigID's advanced data-centric, risk-aware security with Cloudrise's security services to comprehensively address your most critical data security, governance, and risk management initiatives.

- **Accelerate** your ability to address your data security, governance, and risk program initiatives.
- **Quickly and proactively** improve your data security and risk posture management.
- **Integrate with** and enrich your existing security ecosystem.

## Establish a Comprehensive Data Security Program

Leverage BigID's advanced AI and ML-based visibility, context, and control in collaboration with Cloudrise managed services to accelerate your data security, governance, and risk management initiatives. Jumpstart your DSPM efforts, meet cybersecurity compliance, enrich your security ecosystem, and implement the proper controls and measures for safeguarding your most sensitive, critical, personal, and regulated information - throughout the entire data lifecycle.

### Kickstart Your BigID Journey

Quickly implement, deploy, and take action with BigID to address your data security, governance, and risk management objectives. Cloudrise leverages a wealth of experiences across hundreds of security programs and tech deployments while staying focused on your data goals. Acting as an accelerator for your BigID initiatives, Cloudrise delivers immediate benefits customized to your unique data challenges. Optimize data security investments through a tailored strategy, achieving quick wins and establishing a foundation for long-term improvements in governance and security.

### Discover All of Your Data

Connect to and scan for sensitive data across any data source and type, from unstructured and structured data to mainframes, messaging apps, pipelines, big data, NoSQL, Cloud IaaS, SaaS, PaaS, applications, dev environments, and beyond. Scan unstructured data 95% faster with Hyperscan. Save time and avoid sensitive data blind spots across the cloud with Auto-Discovery.

### Know Your Data With Context

Combine traditional pattern matching techniques with advanced, ML and NLP-based classification to achieve unparalleled accuracy and scalability in data classification. Customize and fine-tune classifiers to suit your unique data requirements. Label and tag data using a unified ruleset. Build a complete and dynamic sensitive data inventory with contextual attributes for holistic understanding.

### Proactively Improve Data Security Posture

Leverage a data-centric, risk-aware approach for data security to effectively improve your security posture, streamline remediation, ensure compliance, shrink your attack surface, and ultimately reduce data risk. Identify, score, and prioritize critical data risks by severity level according to sensitivity, location, accessibility, and more. Remediate data your way - centrally manage data remediation workflows or decentralize them across your data security stack - including data encryption, deletion, masking, tokenization, and more.

### Get Cybersecurity Compliant

Achieve compliance by implementing controls around personal, sensitive, and regulated data. Enforce and manage hundreds out of the box policies to monitor data location and movement and trigger controls for compliance with NIST, CISA, PCI, and more. Streamline data retention and deletion policies at scale according to business and regulatory requirements.

### Leverage A World-Class Data Security Team

Leverage a world-class team of data security experts to protect your data where it resides. Cloudrise's decades of experience, combined with the Cloudrise University certification program, enables them to deliver unparalleled proficiency, scalability, and expertise in overseeing and advancing data-centric initiatives and security technologies.

### Optimize & Integrate Your Tech Stack

In addition to BigID, Cloudrise collaborates with top-tier Security Service Edge (SSE), and cloud security solutions to protect data throughout its entire lifecycle. Drawing from decades of experience in deploying, optimizing, and managing cutting-edge technology, Cloudrise's expertise spans diverse industries, geographies, organizational scales, and regulatory landscapes, ensuring comprehensive support for various compliance requirements.

## Maximize the Value of Your BigID Investment

Seamlessly layer on Cloudrise security services to build, deploy, and optimize BigID.

### ▶ **Advisory Services:**

- ▶ Align with business and regulatory needs to design a robust data security, governance, and risk program.
- ▶ Guide decisions on people, processes, and technology to position your organization for successful technology adoption.

### ▶ **Deployment Services:**

- ▶ Operationalize data discovery, classification, and security for initial operating capability.
- ▶ Establish scanning priorities and profiles, connect data sources to BigID applications, and confirm operability through pilot scans.
- ▶ Tune and configure ongoing scanning for scalability.

### ▶ **Optimization Services:**

- ▶ Attain full operating capability and expand the scope as required.
- ▶ Integrate BigID into a broader technology ecosystem, implement additional BigID applications, and continuously refine processes and policies based on scan results.

## Ready to transform data management and security into a strategic advantage?

Connect with our team to discover how we can help enhance compliance, protection, and operational efficiency.

## About BigID

BigID enables security, compliance, privacy, & governance for all data, everywhere. BigID is enterprise-ready and built to scale: enabling a data-centric approach to comprehensive cloud data security & DSPM, accelerating compliance, automating privacy, and streamlining governance. Customers deploy BigID to proactively discover, manage, protect, and get more value from their regulated, sensitive, and personal data across their data landscape.

BigID has been recognized for innovation as a 2019 World Economic Forum Technology Pioneer; named to the Forbes Cloud 100; the Inc 5000 for 3 consecutive years; the Deloitte 500 for 3 consecutive years; Market Leader in Data Security Posture Management (DSPM); Leader in Privacy Management in the Forrester Wave; and an RSA Innovation Sandbox winner.

## Know Your Data, Control Your Data.

**Data Security • Compliance • Privacy • Governance**

Reduce risk, accelerate time to insight, and get data visibility and control across all your data - everywhere.

“ **Tools like BigID are the future.**

Organizations should be leveraging these tools to remove the manual processes from data discovery, provide better visibility, and help with prioritization of controls.
