Job Description – Engineer

POSITION SUMMARY

The Engineer supports Cloudrise clients by managing the technical aspects of our Professional Services engagements. Engineers assist our clients with the design and implementation of holistic and targeted solutions needed to meet and exceed the requirements of best practice for various Data Security solutions.

LOCATION: London, UK

DUTIES & ESSENTIAL JOB FUNCTIONS

- Assist clients in designing, deploying, and managing technology and process solutions to reduce the potential of data compromise
- Assist clients with developing technical requirements, evaluating vendor solutions, developing architecture & design, and testing of data protection and data security solutions
- Executes project delivery as noted in client SoWs, consistently delivering quality client services
- Responsible for the management, advanced configuration, and fine tuning of various data protection technologies
- Troubleshoot application-based performance issues or outages of technologies
- Advise clients in understanding the future state problems and challenges in cyber security and work collaboratively with them to enhance capabilities
- Operate as a technical subject matter expert
- Be up to date on industry trends around cyber risk and data protection practices
- Perform other duties as assigned

QUALIFICATIONS

- BA or BS in Computer Science or Information Management
- 1-3 years working in cyber security and/or technology engineering support experience
- Previous experience and knowledge of leading Data Protection technologies (i.e. Netskope, BigID, Symantec/Broadcom, Forcepoint, McAfee)
- Basic knowledge in system security architecture and security solutions
- Willingness to travel (up to 50%+)
- Strong analytical and problem-solving skills

PREFERRED

- Previous experience at a Big 4 consulting firm
- Self-motivated to improve knowledge and skills
- Netskope certifications or previous knowledge
- Industry standard certifications, including Security+, Network+, CISSP, etc.
- Vendor certifications from other leading DLP and CSG technologies
- Works well both in a team environment and independently

This list of duties and responsibilities is not intended to be all-inclusive and may be expanded to include other duties or responsibilities that management may deem necessary from time to time.

To apply, please send your resume and a cover letter to careers@cloudrise.com
