

# Cloudrise Services for Netskope

*How do you plan to maximize your investment in the Netskope technology suite?*

Netskope is a powerful platform with almost endless capabilities to secure your data wherever it resides. Regardless of where you are on your journey with Netskope, there is never a point where you can “set it and forget it”.

## ***Our Approach***

Once we understand your business use cases and where you are in your journey, we can help build, deploy, optimize, and manage your technology platform so you can realize the utmost value from your purchase.

Our services are available as 1 to 3-year subscriptions or as custom engagements. Why? It's simple – map your services to your cloud-based license subscriptions and then focus on your business...while we protect your data.

## ***ABOUT CLOUDRISE***

*Cloudrise is a security services provider focused on protecting organizations' data — wherever it resides. On prem, in the cloud, or anyplace in between, Cloudrise is an extension of the team, tailoring our scalable service model to security needs across the entire data lifecycle. We build, deploy, optimize, and manage data security programs utilizing market-leading platforms. With centers of excellence in Colorado, the U.K. and Colombia, our experience spans multiple industries, geographies, and organizational sizes.*
