

2025 SOLUTION BRIEF

# **Jumpstart Data Security, Governance & Risk Management with BigID & Cloudrise**

---

Advanced data intelligence and expert services deliver comprehensive data security, governance, and risk management at enterprise scale.

---

## 2025 Solution Brief

# Jumpstart Data Security, Governance & Risk Management with BigID & Cloudrise

Combine BigID's advanced data-centric, risk-aware security with Cloudrise's expert managed services to effectively tackle your most pressing data security, governance, and risk management challenges.

- **Expedite** progress on your key data security, governance, and risk management initiatives.
- **Strengthen** your data security and risk posture proactively and efficiently.
- **Seamlessly integrate** with and enhance your existing security infrastructure.

## Industry-leading DSPM for Cloudrise Managed Services

- **Unmatched Data Visibility:** Industry-leading discovery and classification across structured, unstructured, and cloud data—providing a holistic view of your sensitive and critical data assets.
- **Intelligent Risk Prioritization:** Context-driven insights that assess risk based on data sensitivity, access patterns, and exposure, enabling smarter and faster decision-making.
- **Automated and Scalable Remediation:** Purpose-built workflows to automate remediation at scale, reducing operational overhead and maximizing efficiency for global teams.
- **Tailored Solutions for Rapid ROI:** Expert deployment and customized strategies designed

to align with unique enterprise needs, accelerating time-to-value for data security initiatives.

## Key Benefits

### Establish a Comprehensive Data Security Program

BigID's AI-powered platform, combined with Cloudrise's managed services, empowers organizations to accelerate data security initiatives with confidence. This partnership enables the rapid deployment of DSPM programs, ensures compliance with regulatory requirements, and protects sensitive data throughout its lifecycle. Enterprises gain the capabilities to secure critical, personal, and regulated data across on-premises, cloud, and hybrid environments.

### Kickstart Your BigID Journey

BigID's unified data security platform provides enterprises with the tools to discover, classify, and protect sensitive data at scale. With Cloudrise's expertise in implementation and optimization, organizations benefit from streamlined platform deployment and tailored strategies. Together, BigID and Cloudrise deliver faster time-to-value through customized solutions while establishing a robust foundation for long-term data security and governance success.

## Key Capabilities

### Discover All of Your Data

BigID scans sensitive data across all enterprise sources through Hyperscan technology and Auto-Discovery capabilities. Cloudrise optimizes these discovery operations through strategic scan configuration and continuous monitoring, ensuring comprehensive coverage as environments grow.

### Know Your Data With Context

BigID combines pattern matching with advanced ML and NLP classification for precise data identification. Cloudrise fine-tunes these classifiers for specific business needs and maintains classification policies that align with organizational requirements.

### Proactively Improve Data Security Posture

BigID identifies and prioritizes data risks based on sensitivity, location, and accessibility, enabling automated remediation workflows. Cloudrise orchestrates these security processes and manages risk configurations to maintain strong data protection across the enterprise.

### Get Cybersecurity Compliant

Cloudrise leverages BigID's extensive policy framework to implement and maintain controls around sensitive and regulated data. Their managed service teams configure and monitor hundreds of pre-built policies to ensure ongoing compliance with NIST,

CISA, PCI, and other frameworks. Cloudrise experts streamline retention and deletion policies at scale, adapting them as business and regulatory requirements evolve.

### **Leverage a Global Managed Security Team**

Cloudrise's certified security professionals maximize BigID platform effectiveness through proactive management and optimization. Their teams align platform capabilities with business objectives and compliance requirements to build comprehensive privacy, security, governance, and risk programs. This managed service approach ensures continuous value realization and program maturation.

### **Optimize & Integrate Your Tech Stack**

Cloudrise architects integrate BigID's platform with leading Security Service Edge (SSE) and cloud security solutions to enable end-to-end data protection. Their expertise spans diverse industries, geographies, and compliance requirements, ensuring optimal deployment and integration of BigID's capabilities across the enterprise security ecosystem.

## **Maximize the Value of Your BigID Investment**

BigID's comprehensive data security platform enables enterprises to discover, protect, and manage sensitive data at scale. Cloudrise's strategic managed services optimize these capabilities through:

## **The BigID Journey with Cloudrise:**

### **Managed Services:**

Cloudrise's managed services deliver proactive administration and optimization of the BigID platform. Organizations enhance operational quality and reliability by leveraging certified experts for day-to-day platform management.

The managed services program supports organizations at every stage of BigID implementation - from initial deployment to mature operations. Cloudrise aligns technology capabilities with business requirements, translating data priorities into clear objectives and milestones.

The first 30 days establish measurable outcomes for the service term, followed by quarterly objective planning that adapts to evolving business needs including:

- Operationalizing data discovery, classification, and labeling
- Establishing scanning priorities and profiles
- Performing ongoing tuning and configuration enhancements
- Integrating BigID into the organization's broader technology stack/ecosystem

- Implementing additional BigID applications/capabilities

### **What are the benefits?**

- Reduce complexity and risk in your BigID environment
- Free up valuable internal resources for strategic work
- Increased efficiency / lower TCO
- Predictable monthly costs
- Scalable resource coverage plans to grow along with you
- Leveraged leading practices from similar industries and regulatory environments.

### **What makes our services different?**

- All managed services professionals are certified on the BigID platform
- Integration with BigID Support to quickly resolve issues
- Flexible staffing tailored to meet your budget and coverage needs
- Evolving data security program driven by business requirements, compliance, and regulatory changes
- Roadmap to expand scope and maximize ROI of BigID investment

**Ready to transform data management and security into a strategic advantage? Connect with our team to discover how we can help enhance compliance, protection, and operational efficiency.**

## About BigID

BigID enables security, compliance, privacy, & AI data management for all data, everywhere. BigID is enterprise-ready and built to scale: enabling a data-centric approach to comprehensive cloud data security & DSPM, accelerating compliance, automating privacy, and streamlining overnance. Customers deploy BigID to proactively discover, manage, protect, and get more value from their regulated, sensitive, and personal data across their data landscape.

BigID has been recognized for innovation as a World Economic Forum Technology Pioneer; named to the Forbes Cloud 100; the Inc 5000 for 4 consecutive years; the Deloitte 500 for 4 consecutive years; Market Leader in Data Security Posture Management (DSPM); Leader in Privacy Management in the Forrester Wave; and an RSA Innovation Sandbox winner.

## Know Your Data, Control Your Data.

**Data Security • Compliance • Privacy • AI Data Management**

Reduce risk, accelerate time to insight, and get data visibility and control across all your data - everywhere.

“ **Tools like BigID are the future.**

Organizations should be leveraging these tools to remove the manual processes from data discovery, provide better visibility, and help with prioritization of controls.
