

Your Services Provider for Gartner® Magic Quadrant™ SASE Leaders

We're proud to align with Leaders in the upper right corner of the Gartner® Magic Quadrant™ for SASE Platforms, because when our vendors have the upper hand, so do our partners and customers.

As the expert in Secure Access Service Edge (SASE) **SERVICES**, Exclusive Networks has partnered with three technology leaders of this distinguished Magic Quadrant: [Fortinet](#), [Palo Alto Networks](#), and [Netskope](#).

COMMON CHALLENGES

A reduction of tech platforms sounds simple enough, but when you factor in competing priorities between security and networking teams, simply converging into a SASE solution is not that easy. Migrating to a SASE platform can be daunting, so we are here to assist with these and other concerns:

- In deep technology debt with siloed, legacy DLP, CASB, VPN and other platforms?
- Your network, infrastructure, data, privacy and cloud teams have different priorities.
- A BYOD and/or remote workforce introduces new risks ... daily.
- Data is propagating every second and there is no way to protect it all.
- You are being asked to do more with less resources.

WHY SERVICES?

SASE is a convergence of security capabilities in the cloud that securely supports workers anywhere, anytime – and with secure and reliable access. Deploying a SASE platform + building a comprehensive program is a recipe that will enable organizations to capitalize on the benefits of convergence.

Other service providers will tell you they can deploy your SASE platform of choice, and that's true! **What differentiates Exclusive Networks is our deep industry-expertise, certified engineers, decades of network and security experience, and our outcome-based approach to services.**

WHAT ARE OUTCOME-BASED SERVICES?

Exclusive Networks' outcome-based services focus on delivering measurable business results rather than just technology deployment.

We start by with your organization's strategic objectives, ensuring security and networking priorities converge seamlessly.

Our certified experts guide you through every stage—from design and migration to optimization—so your investment continues to deliver value over time.

By leveraging proven methodologies and deep industry expertise, we help reduce complexity, accelerate adoption, and maximize ROI. This approach transforms SASE from a technical project into a long-term business enabler.

WHY YOUR VENDOR MATTERS

Partnering with SASE industry leaders, Netskope, Palo Alto and Fortinet, is the first step in securing organizations' networks, users, and data.

By layering outcome-based services atop a leading SASE platform, Exclusive Networks will ensure your investment keeps delivering quarter-after-quarter.

Together, we assist organizations with accelerating their SASE journey from seamless deployment to ongoing optimization.
